

## Beijing Yanding

### **Team China is seeking experienced Performance Coaches to work with national athletes**

Contracts will be directly with the Chinese Olympic Committee (COC) and managed by Beijing Yanding – Team China PT/PC Project Director.

Founded in 2007, Beijing Yanding (BY) is a pioneer in sport performance equipment and technology sales and the provision of sport medicine and performance coaching staff to athletes across China, as well as the delivery of physical therapy and performance education across SE Asia. We serve the high-performance population from youth to the Olympic and professional level, as well as tactical athletes.

Performance Coaches (PC) will be responsible for the individual and team training programs for one or more national sport teams including injury prediction and prevention, adaptation of training for injured athletes, performance enhancement, and athlete/team wellness. The COC will match your experience and interests to the appropriate national sport(s) teams. PCs will operate out of National Training Centres or any other location as directed by the requirements of the team.

This is an exciting opportunity for experienced and passionate PCs who possess a valid MSc. degree (or equivalent) from a recognized institution with at least five years proven experience working with high performance athletes or teams (e.g. Div1/Div 2, Pro/Semi-Pro, National). You will be given the opportunity to work with Team China athletes as part of a team which includes experienced Technical Coaches, Chinese trained doctors (acupuncture/massage), and foreign trained physical therapists.

Specifically, we are looking for PCs with advanced training in movement assessment, strength and conditioning (e.g. ASCA – Level 2/3, Sports Power Coach (AWF), NSCA-CSCS, UKSCA – ASCC, CSEP-CEP, NCCP Level 1/2 in T&F, Weightlifting etc.), current methods in performance training (e.g. velocity-based training, force plate assessment, GPS systems), and wellness monitoring (e.g. sleep, nutrition, recovery etc.).

Successful candidates will be offered contracts ranging from 2.5-4.5 years in duration preparing athletes for the next Summer and Winter Olympics. This position will require domestic and international travel. The ability to read, write, and speak English is mandatory. Credit will be given to those who can communicate in Chinese.

Salary ranges from 4,000-4,750USD/month (before taxes) dependent upon experience. Benefits include 250USD/month to assist with the cost of medical insurance, flight to China (economy), reimbursement for visa application costs upon arrival in China, one return international flight (economy) per year, 20 days of paid holidays per year, and no cost accommodations and food will be provided at the appropriate training site(s), and a minimum of 12 days of education per year through the Movement Academy.

For married PCs with a spouse traveling to China, a 1,000USD/month apartment stipend may be available to qualified applicants. Any additional spousal costs will be at the applicant's expense.

At this time, we have no ability to support the housing of families.

### **Positions are available immediately.**

To apply, please submit your resume and cover letter by **15 Jun, 2018** to [physiomandan@icloud.com](mailto:physiomandan@icloud.com) and include "Yanding PC Application – Your Last Name" in the subject line.

**Daniel Crumback MSc.RS (candidate), BSc.PT, Dip Sport PT, CEP, CSCS, CAFCI  
Team China PT/PC Project Director**
